Accelerated Testing Nature And Artificial Weathering In

remember that accelerated testing, as one form of reliability testing, is a very specific technical method. To sum up, accelerated testing consists of, "accelerating the mechanisms causing product failure by using conditions that are more severe than standard conditions, and saving testing time by utilizing the systematic nature

Comparison Between Natural Weathering and Fluorescent UV

Accelerated life testing is the process of testing a product by subjecting it to conditions (stress, strain, temperatures, voltage, vibration rate, pressure etc.) in excess of its normal service parameters in an effort to uncover faults and potential modes of failure in a short amount of time.
