American Journal of Theoretical and Applied Statistics (AJTAS) publishes papers developing and analyzing new methods for any field of statistics. It is expected that the papers give interesting and novel contributions to statistical theory and its applications at a good mathematical level. The results should be presented in form of theorems together with their mathematical proofs, which should ...

The SIR model. The SIR model is one of the simplest compartmental models, and many models are derivations of this basic form. The model consists of three compartmentsâ€” S for the number susceptible, I for the number of infectious, and R for the number recovered (or immune). This model is reasonably predictive for infectious diseases which are transmitted from human to human, and where recovery ...

The epidemiology of autism is the study of the incidence and distribution of autism spectrum disorders (ASD). A 2012 review of global prevalence estimates of autism spectrum disorders found a median of 62 cases per 10,000 people. There is a lack of evidence from low- and middle-income countries though. ASD averages a 4.3:1 male-to-female ratio. The number of children known to have autism has ...

Descartes argues that no explanation of any phenomenon may assume or merely reâ€•describe what needs to be explained. He cannot, therefore, propose substance dualism as a theory of mind. To explain mental activities such as sensation, memory, or imagination, one must hypothesize how they result from interaction between the environment, the senses, and the processing of the brain.
