Intelligent design (ID) is a pseudoscientific argument for the existence of God, presented by its proponents as "an evidence-based scientific theory about life's origins". Proponents claim that "certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection." ID is a form of creationism that lacks empirical ...

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

One of the most fundamental doctrines held dear by Christians is God's creation of the world and all living creatures. Yet among evangelicals, an ongoing controversy exists regarding the age of the earth and when God created the universe and life. Indeed, the "young-earth" vs. "old-earth" debate is one of the most polarizing and divisive issues within the Christian community.
