## neutron x rays and pdf

X-rays and neutrons are complementary to SPMs. Yield GLOBAL statistical properties about assemblies of particles. Can be used to study BURIED interfaces or particles. Impervious to sample environmental conditions, magnetic fields, etc. Can also be used to study single

be made concerning the fl for both X-rays and neutrons. The absorption depends, in the case of X-rays, on the interaction of the incident photons with the electrons in the sample, whereas for neutron, it is the interaction of the neutrons with the nucleus. The absorption cross-section for X-rays is much greater than that for neutrons.
