The social construction of gender is a notion in feminism and sociology about the operation of gender and gender differences in societies. According to this view, society and culture create gender roles, and these roles are prescribed as ideal or appropriate behavior for a person of that specific sex.. Some supporters of this idea argue that the differences in behavior between men and women ...

The second thread of reading instruction involves phonics and decoding. Phonics is the ability to identify that there is a relationship between the individual sounds (phonemes) of the spoken language and the letters (graphemes) of the written language. Decoding is being able to use visual, syntactic ...

A bias tee is a three-port network used for setting the DC bias point of some electronic components without disturbing other components. The bias tee is a diplexer. The low-frequency port is used to set the bias; the high-frequency port passes the radio-frequency signals but blocks the biasing levels; the combined port

connects to the device, which sees both the bias and RF.
