

### **research data management practical pdf**

Research comprises "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

### **Research - Wikipedia**

Research data is collected, observed or generated factual material that is commonly accepted in the scientific community as necessary to document and validate research findings.

### **Open Research Data - SNF**

Funding bodies increasingly require grant-holders to develop and implement Data Management and Sharing Plans (DMPs). Plans typically state what data will be created and how, and outline the plans for sharing and preservation, noting what is appropriate given the nature of the data and any restrictions that may need to be applied.
