Emotion Recognition With Python, OpenCV and a Face Dataset

Face perception is an individual's understanding and interpretation of the face, particularly the human face, especially in relation to the associated information processing in the brain.. The proportions and expressions of the human face are important to identify origin, emotional tendencies, health qualities, and some social information.

CVPR2018

Affective computing (sometimes called artificial emotional intelligence, or emotion AI) is the study and development of systems and devices that can recognize, interpret, process, and simulate human affects. It is an interdisciplinary field spanning computer science, psychology, and cognitive science. While the origins of the field may be traced as far back as to early philosophical inquiries ...

Vinodpuri Rampuri Gosavi et al A Technical Review on Face Recognition based on BP Neural Network

A Technical Review on Face Recognition based on BP Neural

VeriLook facial identification technology is designed for biometric systems developers and integrators. The technology assures system performance and reliability with live face detection, simultaneous multiple face recognition and fast face matching in 1-to-1 and 1-to-many modes.

Deborah Sole, LILA Harvard University Daniel Gray Wilson, LILA Harvard University Sharing experiences through stories is emerging in various professions as a powerful

Storytelling in Organizations: The power and traps of

The ability to recognize oneself in a mirror is an exceedingly rare capacity in the animal kingdom. To date, only humans and great apes have shown convincing evidence of mirror self-recognition. Two dolphins were exposed to reflective surfaces, and both demonstrated responses consistent with the use of the mirror to investigate marked parts of the body.

Mirror self-recognition in the bottlenose dolphin: A case

Face Recognition ¶. Face recognition is an easy task for humans. Experiments in have shown, that even one to three day old babies are able to distinguish between known faces. So how hard could it be for a computer? It turns out we know little about human recognition to date.

Driving Customer Service Excellence: Patient Access

We use data to tell stories of business-related trends we focus on. We hope others take the ideas, build on them & make them better. At 3.6B, the number of Internet users has surpassed half the world’s population.

Internet Trends Report 2018 | Kleiner Perkins

Eye tracking is a technology that has quickly become a commonplace tool for evaluating package and webpage design. In such design processes, static two-dimensional images are shown on a computer screen while a subject’s gaze where he or she looks is measured via an eye tracking device.

A system for three-dimensional gaze fixation analysis

Welcome to IEEE TENCON 2016! TENCON is a premier international technical conference of IEEE Region 10, which comprises 57 Sections, 6 Councils, 21 Subsections, 514 Chapters and 1159 Student Branches in the Asia Pacific region. The theme for TENCON 2016 is Technologies for Smart Nation. TENCON 2016 is expected to bring together researchers, educators, students, practitioners, technocrats and ...

Fig. 1 shows a bird's eye view of supervised learning. Although the data in this case are labelled, unsupervised methods are extensively used in the initial stages of the analysis to explore the data (e.g. visualization of high-dimensional data sets) and extract putative discriminatory features (see section Feature Extraction). Once an appropriate feature set is determined, the observations are ...

Applications of machine learning in animal behaviour

Airport/Airline Security Airport/Airline Security: "Intelligence and Airports," by Robert T. Raffel, 76 FBI Law Enforcement Bulletin No. 4, pgs 1-7 (April 2007). "Airport security practitioners have several avenues to receive and use information and intelligence."

There is worldwide concern over false news and the possibility that it can influence political, economic, and social well-being. To understand how false news spreads, Vosoughi et al. used a data set of rumor cascades on Twitter from 2006 to 2017. About 126,000 rumors were spread by $\hat{\approx}$ 3 million people. False news reached more people than the truth; the top 1% of false news cascades diffused to ...
