Metrology is the science of measurement. It establishes a common understanding of units, crucial in linking human activities. Modern metrology has its roots in the French Revolution's political motivation to standardise units in France, when a length standard taken from a natural source was proposed. This led to the creation of the decimal-based metric system in 1795, establishing a set of ...

PERFORMANCE MEASUREMENT August 2008 5 EXECUTIVE SUMMARY Defining outcomes, intermediate outcomes and outputs provides guidance on how to define the three levels of the framework well, and what good measures will look like. Developing measures and indicators covers how to choose your measures, and how to ensure appropriate data is collected in order to chart and report progress.

7 Outcome measurement will explore what your program provides, what its intended impacts are, and whether or not it achieves them. It will not prove that the changes that take place are a result of your program. People often get stuck in the outcome measurement process because of all the terminology.
