Terminology. Heart failure is a pathophysiological state in which cardiac output is insufficient to meet the needs of the body and lungs. The term "congestive heart failure" is often used, as one of the common symptoms is congestion, or build-up of fluid in a person's tissues and veins in the lungs or other parts of the body. Specifically, congestion takes the form of water retention and ...

Amlodipine, sold under the brand name Norvasc among others, is a medication used to treat high blood pressure and coronary artery disease. While not typically recommended in heart failure, amlodipine may be used if other medications are not sufficient for high blood pressure or heart-related chest pain. Amlodipine is taken by mouth and has an effect for at least a day.
